

AFRC
FIREFIGHTER
RESCUE + SURVIVAL I

ABOUT

IMAGINE speaking what could be your last words while calling a mayday tonight. Now imagine the ideal crew of firefighters you would want responding to your call for help. Do you have the abilities and knowledge of the firefighters you envision? Have you obsessed over the fundamentals that could save your life or the life of a fellow firefighter? Many firefighters go their entire careers without calling a mayday or being a part of a RIT activation; however, they occur numerous times a year in structures identical to the ones we respond to on Air Force installations every day.

During such a high risk/low frequency event, we've got one shot and it's pass or fail - either we will possess the knowledge, physical ability, and mental fortitude necessary to enable a successful outcome, or we won't. The purpose of this course is to provide repetitions for the career-long journey of preparing for that event.

OBJECTIVES

SURVIVAL

- Calling the mayday
- Survival mindset
- SCBA familiarization
- Air consumption
- Wall breach/low profile
- Entanglement
- Bailouts

RESCUE

- Search
- RIT positions and tactics
- Firefighter packaging
- Advanced drags and carries
- Up and down stairs
- Denver drill
- Nance drill

STANDARDS

All objectives are in accordance with AFI 32-2001 and NFPA 1407. NIOSH and near miss reports will be used to supplement each learning objective. Instruction will be hands on and skill stations will be divided to facilitate a crawl-walk-run learning framework.

Course will meet and exceed requirements for the following annual training:

- Firefighter Near Miss
- Fire Control
- Fire Ground Search and Rescue
- Fire Ground Survival
- Rapid Intervention Teams
- NIOSH Firefighter Fatality study
- Personal Protective Equipment / SCBA
- Emergency Procedures
- Ropes and Knots
- Water Supplies, Fire Hose, and Fire Streams
- Structural Exercise
- Structural Live Fire Training (SORTS Reportable)
